(<http://giw.ims.u-tokyo.ac.jp/giw2004/>)

The Fifteenth International Conference on Genome Informatics (GIW 2004) is a forum for researchers, practitioners and users working on various aspects of Genome Informatics. The aim is to present recent research results (theory/practice), to demonstrate systems, and to explore directions for future research and new applications.

### SPONSORED AND ORGANIZED BY

Bioinformatics Center (Kyoto University),  
Human Genome Center (University of Tokyo) and  
Grant-in-Aid for Scientific Research on Priority Areas  
“Genome Information Science” (MEXT of Japan).  
Poster and Software Demonstration Session is organized and  
sponsored by Japanese Society for Bioinformatics (JSBi,  
<http://www.jsbi.org/>).

### SCOPE

GIW is the longest running international bioinformatics conference, which provides unique opportunities that bridge theory and experiments, academia and industry, and East and West. Its scope includes all work that is ultimately devoted to the computational understanding of biological systems on a molecular basis.
